TITLE: Multilingual electronic document translation,  
management, and delivery system

US Patent No. - PN (1):

6623529

Application Filing Date - AD (1):

19990128

Detailed Description Text - DETX (8):

The Visitor module intercepts input **text** that is submitted using an HTML form (e.g., a **customer feedback** form), and writes it into a form database 205, in a manner so that it is easily translated later via the Workflow Manager. Most Web sites have forms that allow site visitors to submit comments or request more information from the site host. This **feedback** might not be in English and would otherwise be incomprehensible to the recipient in a multilingual environment.
